## Body-Worn Camera Footage Release Delayed in December's Fatal Officer-Involved Shooting in Baltimore County

**BALTIMORE, MD (February 9, 2024)** – The Independent Investigations Division (IID) of the Maryland Office of the Attorney General announced today that the release of the body-worn camera footage of the fatal officer-involved shooting in Baltimore County on January 9, 2024, has been delayed.

Per IID protocols: “The IID will generally release body-worn and/or dashboard camera footage within 20 business days after the incident. There may be situations where more than 20 business days are necessary, including, but not limited to: investigators needing more time to complete witness interviews; technical delays caused by the need to redact information that raises privacy or safety concerns; or allowing family members or subject officers to view the video before it is released to the public. There may also be situations where the IID releases video sooner than 20 days where there is a substantial public interest in doing so. If the release of video is delayed, the IID will notify the public there’s been a delay and state the reason for the delay.”

Due to the need to redact information that raises safety concerns, the release of the video in this case has been delayed.
