Re: Permian Resources Notice pursuant to Maryland Code Commercial Law § 14-3501

Dear Attorney General:

We represent Permian Resources Corporation, an oil and natural gas company. Permian Resources is providing a notice pursuant to Maryland Code Commercial Law § 14-3501 of a cybersecurity incident that may have affected the personal information of residents of Maryland.

Number of Maryland Residents Affected by the Breach

The cybersecurity incident may have affected the personal information of 5 residents of Maryland. The personal information affected may include individuals' names, addresses, Social Security numbers, and tax identification numbers.

What Happened

On or about December 11, 2023, Permian Resources determined that through a series of phishing emails, an unknown third-party gained unauthorized access for a limited period of time to two employee email accounts.

Permian Resources immediately activated its incident response plan and team to secure the affected accounts and contain the incident. Permian Resources learned that the email accounts had been accessed without authorization by using credentials stolen through a phishing scheme. The same scheme led to unauthorized access to a total of two email accounts. Based on forensic analysis, the initial credential theft occurred on November 21, 2023, and the unauthorized access occurred on December 8, 2023 and December 11, 2023, and the incident was fully contained by December 11, 2023.

What Permian Resources is Doing

Permian Resources engaged a reputable law firm, who engaged third-party forensic analysis firm and a document review firm to analyze the contents of the affected email accounts, and conducted interviews
